Profile

Hardworking and passionate Undergraduate Computer Science student, highly skilled at problem solving and ready to apply everything I have learned during my university studies.

Employment History

Undergraduate Teaching Assistant, University of Crete, Heraklion

SEPTEMBER 2022 — JANUARY 2023

I am currently a Teaching assistant for the course: CS-252(Object-Oriented Programming with Java). Have deployed many social skills answering questions done by my fellow students.

Custom Service, Savoidakis Bakery & Patisserie, Heraklion

MAY 2022 — AUGUST 2022

I was providing several services to customer, helping me improve a lot my cooperation skills and also my communication skills.

Education

Bachelor's, Computer Science Department, University of Crete, Heraklion

SEPTEMBER 2019 — JANUARY 2024

Currently working on my Bachelor's degree in Computer Science.

General High School of Gazi, Gazi, Heraklion

SEPTEMBER 2016 — JUNE 2019

Projects, Computer Science Department

- PayDay Board game implementation in Java (greeklish cards) with Graphical User Interface.
- Compiler design for Alpha programming language (lexical analyzing, grammar analyzing, intermediate code generation, target code generation).
- A lightweight Linux Shell implementation, supporting global shell variables (means that their scope is even in the possibly declared sub-shells), multiple piping, and of course all the commands supported by linux.
- MicroTCP: A lightweight TCP implementation using UDP transport layer.
